

EMPLOYEE MANAGEMENT SYSTEM

Wireframe Design Documentation

UI/UX Screen Reference

1. Document Overview

This document records the Employee Management System wireframes supplied for the project. It covers authentication, administration, employee operations, leave, attendance, salary and payroll, support, notifications, and profile management.

2. Screen Summary

No.	Screen	Purpose
1	Landing / Login Page	Entry screen with login, role preview, remember-me, forgot-password, and registration/help.
2	Forgot Password	Password recovery screen for requesting a reset link using the registered email.
3	Admin Dashboard	Admin overview with employee, attendance, leave, payroll, support, notifications, and quick actions.
4	Employee Management	Employee directory with search, filter, employee details, status, View, Edit, and Delete.
5	Department Management	Department directory with search, department lead, employee count, status, View, Edit, and Delete.
6	Leave Management	Leave application, leave balance, leave history, pending requests, and approval status.
7	Attendance	Check-in/check-out, daily and weekly hours, monthly attendance, and attendance history.
8	Salary & Payroll — Employee View	Employee salary view with salary components, revision history, approved bonus, approved overtime, and payroll information.
9	Salary & Payroll — Admin View	Admin salary/payroll view with salary revision, bonus, overtime review, revision history, approved bonus, overtime, and payslips.
10	Support	Create tickets, set priority, describe issues, assign tickets, and update ticket status.
11	Notifications	All/unread notifications, leave updates, payroll updates, support updates, and Mark as Read.
12	Profile	Profile information including employee ID, contact, department, role, joining date, and Edit Profile.

1. Landing / Login Page

Purpose: Entry screen with login, role preview, remember-me, forgot-password, and registration/help.

2. Forgot Password

Purpose: Password recovery screen for requesting a reset link using the registered email.

The image shows a web application interface with a modal dialog for password reset. The modal, titled 'Reset password', is centered on the screen. It contains a text input for 'Registered email' with the placeholder 'name@company.com'. Below the input is a 'Verify and send link' button. At the bottom of the modal are 'Cancel' and 'Go Back' buttons. The background is a dimmed login screen titled 'Welcome back'. It has fields for 'Email or username' (with 'name@company.com' entered), 'Password' (with 'Enter your password'), and a 'Remember me' checkbox. There is also a 'Forgot password?' link and a 'Log in' button at the bottom.

3. Admin Dashboard

Purpose: Admin overview with employee, attendance, leave, payroll, support, notifications, and quick actions.

4. Employee Management

Purpose: Employee directory with search, filter, employee details, status, View, Edit, and Delete.

5. Department Management

Purpose: Department directory with search, department lead, employee count, status, View, Edit, and Delete.

6. Leave Management

Purpose: Leave application, leave balance, leave history, pending requests, and approval status.

7. Attendance

Purpose: Check-in/check-out, daily and weekly hours, monthly attendance, and attendance history.

8. Salary & Payroll — Employee View

Purpose: Employee salary view with salary components, revision history, approved bonus, approved overtime, and payroll information.

9. Salary & Payroll — Admin View

Purpose: Admin salary/payroll view with salary revision, bonus, overtime review, revision history, approved bonus, overtime, and payslips.

[illegible]

10. Support

Purpose: Create tickets, set priority, describe issues, assign tickets, and update ticket status.

11. Notifications

Purpose: All/unread notifications, leave updates, payroll updates, support updates, and Mark as Read.

12. Profile

Purpose: Profile information including employee ID, contact, department, role, joining date, and Edit Profile.

3. Role-Based Operation Notes

- **Employee:** View salary, revision history, approved bonus, approved overtime and payslips; submit overtime requests; apply leave; check attendance; create support tickets.
- **Manager:** View team information and attendance; approve or reject leave; review and approve or reject overtime.
- **HR:** Manage employees and departments; manage salary, salary components, salary revisions, bonuses, overtime approvals, payroll and payslips.
- **Admin:** Broader administrative access including employee, department, salary/payroll, user-role and support operations.
- **Support Staff:** View, assign, update, resolve and close support tickets.

4. Important Salary Rule

Employees should not directly add or modify their own salary, bonus, or salary revision. Employees can view approved salary information and submit overtime requests. Authorized HR/Admin users handle salary revisions and bonuses, while overtime follows an approval workflow.

5. Design Consistency

The supplied screens use a consistent left navigation, top header, workspace layout, tables, cards, status badges, and action buttons. This structure should remain consistent during frontend implementation.
